Sprint #5 Tasks

User Story #5: As Terry Sanders, working as a service provider of [Place Holder] organization, I want to be able to view the information relevant to our organization, so we may better prepare necessary provisions for clients at our facilities.

Task 29 (SP: 4, D: None): Connect GUI to back-end, allowing viewing of selected data.

Task 30 (SP: 4, D: Rest of US5): Release feature. Ensure integration with existing features.

User Story #6: As Terry Sanders, working as a service provider of [Place Holder] organization, I want to be able to filter the iCare templates for clients by attributes who are requesting for our services before possibly saving into a separate document, so we may easily view specialized information relevant to our organization's specific services.

Task 31 (SP: 4, D: None): Update exporting methods to allow importing of data to Excel files.

Task 32 (SP: 4, D: None): Connect GUI to back-end, allowing downloading of selected data.

Task 33 (SP: 2, D: None): Create sample templates with dummy data for testing of report production

Task 34 (SP: 4, D: None): Research graphical/chart APIs for report production

Task 35 (SP: 4, D: None): Create GUI for pre-set report generation

Task 36 (SP: 6, D: None): Code function(s) to manipulate SQL table data based on required columns for report(s)

Task 37 (SP: 4, D: None): Connect GUI with back-end generation of graphical/chart reports and downloading

Task 38 (SP: 4, D: Rest of US6): Release feature. Ensure integration with existing features.

Sprint #6 Tasks

User Story #6: As Terry Sanders, working as a service provider of [Place Holder] organization, I want to be able to filter the iCare templates for clients by attributes who are requesting for our services before possibly saving into a separate document, so we may easily view specialized information relevant to our organization's specific services.

Task 31 (SP: 4, D: None): Update exporting methods to allow importing of data to Excel files.

Task 32 (SP: 4, D: None): Connect GUI to back-end, allowing downloading of selected data.

Task 33 (SP: 2, D: None): Create sample templates with dummy data for testing of report production

Task 34 (SP: 4, D: None): Research graphical/chart APIs for report production

Task 35 (SP: 4, D: None): Create GUI for pre-set report generation

Task 36 (SP: 4, D: None): Code back-end generation of queries for bar graph/pie chart generation

Task 37 (SP: 4, D: None: Display filtered information into a bar graph/pie chart

Task 38 (SP: 3, D: None): Update import methods to store correct type of imported cell data

Task 39 (SP: 2, D: None): Save queries so that the user doesn't have to retype their data every time

Task 40 (SP: 4, D: None): Connect GUI with back-end generation of graphical/chart reports and downloading

Task 41 (SP: 4, D: Rest of US6): Release feature. Ensure integration with existing features.
